ABOUT ME

I am detail-oriented Full Stack Web Developer with a passion for building innovative, user-friendly web applications. I leverage my skills in both front-end and back-end development along with problem-solving, and collaboration to deliver high-quality solutions. Continuously expanding my technical knowledge, I strive to contribute to the success of the organization I work with.

Netflix Clone (2024)

Technologies Used:

- **Frontend:** HTML5, CSS3, JavaScript, React (optional if applicable), TMDB API
- **Version Control:** Git, GitHub
- **Deployment:** GitHub Pages

Skills Gained

- **API Integration:** Gained experience in integrating and working with third-party APIs (TMDB API) to retrieve real-time data, such as movie titles, descriptions, and images.
- **Responsive Web Design:** Demonstrated the ability to create a responsive layout that adapts to various screen sizes using CSS Grid, Flexbox, and Media Queries.

- **UI/UX Design:** Focused on user interface design, ensuring that the application is visually appealing and easy to navigate, replicating Netflix's polished design.
- **JavaScript and DOM Manipulation:** Leveraged JavaScript for DOM manipulation and dynamic content loading, making the app interactive and engaging.
- **React (Optional):** If React was used, this demonstrates proficiency in building interactive user
